Bühler. Intelligent solutions.

Tents are our passion.

But not only tents. As a full-service supplier we also plan, construct and produce all types of platforms, pagodas, pavillions and halls customised to your individual concepts and wishes.

Our success story began in 1995. Starting as a three man business our company quickly grew to become a medium sized business that not only has an outstanding position in the market, but also a large and well known customer base. The number of employees and the size of the whole company

has grown constantly, along with its product range and business activities. That's why we were honoured to receive the "TOP founder of the year" award in 2006.

Today Buehler Zelt- und Bühnensysteme GmbH is internationally one of the leading companies in its field. On a site of about 30,000 m² we have large rooms and the most up-to-date equipment for planning, construction and production. This combined with our competent team guarantees perfect results.

65 qualified employees and 80 persons in ancillary companies work day by day to offer you the best quality and first class service. We'll gladly go the extra mile to make you happy.

Unique and new since autumn 2008: Visit our permanent tent exhibition! On an area of 3,000 m² you can experience the complete range of our tent and hall systems. We look forward to meeting you.

From first concept to finished product.

Of course we give you the option of tailoring the production of your tent, hall or whatever you need to your own personal wishes and demands. Because besides our large assortment, which by the way, we can offer you as rental or purchase, we are happy to develop individual special constructions.

It really is this simple:

In extensive consultations we work out the first concept together. As soon as all details are clarified, our in-house construction team puts it to paper. In our production department the blueprints take shape. A competent team makes sure that the finished product

meets your requirements in every way. Continuous checks during the whole manufacturing process ensure that all materials used are in perfect condition. Finally we deliver the goods directly to you using our own transport or a dependable logistics company – prompt and on schedule. Or we can send you our

dynamic assembling team which takes care of the construction at a time and place of your choice.

This is why all our processes not only run smoothly but are also as easy and comfortable as possible for our customers.

- ☒ Snow load halls
- ☒ Platforms
- ☒ Special-constructions on demand
- ☒ Flooring for tents and halls
- ☒ Heating and cooling systems
- ☒ Interior design of great variety

Produced professionally.
For more innovation.

You can always count on us to produce premium quality. Because this equation makes sense: If all parts are produced by professionals and are of a high quality, then the result can only be a professional product of a high quality. We are fully committed to this slogan. Our in-house production includes steel und aluminium

construction as well as canvas production. With our up-to-date computer operated and fully automatic CNC machining centre we can produce all the necessary metal parts fast, with high precision and also at a low cost. Our high-frequency welding machine can withstand even the greatest pressure. High-tech equipment is

also used in the canvas. This is how we can make all your wishes become reality.

But our production chain does not come to an end with a perfect result. We want you to be completely satisfied. Only then do we consider our job done.

All-round service

In order to offer flexible and customer-oriented solutions one thing is of crucial importance: to be receptive to your requests. That is not only important to our head office in Großeibstadt but also to our sales departments all over the world.

Every customer regardless of which sector they've come from receives personal advice and service that suit his needs perfectly. If you are looking for exclusive VIP tents for event agencies, creative and flexible sales stands for trading, low budget solutions for private use or individual warehouses with prompt installation for use in industry – we are the right address!

Our reliable service underlines this philosophy. Because our support doesn't end with the sale or rental of our tents. We deliver the ordered product and/or assemble it right on-site. Of course we also carry out repair and maintenance jobs thoroughly and at a low cost.

We also clean your PVC covers in our in-house washing centre. During the washing process your canvasses are professionally inspected and checked for potential damages.

Now that's what you call a "clean service".

At this point we would like to thank all our business partners who were kind enough to help us realise this brochure.

We look forward to good and reliable team work in the future.
