Bühler.

Well planned. Roofed perfectly.

Our success story began in 1995. Starting as a three men business our company quickly became a medium sized business whose number of employees, product range and business activities grew constantly. This is the reason why Buehler GmbH can not only proof an outstanding position in the market but also a large and well known customer base.

Our tents and halls are fabricated practice-oriented and with the expertise of a strong company.

Qualified employees work day by day to offer you the best quality and first class service.

From consulting to planning to installation you can get everything under one roof.
